Full Stack Web Developer with 1+ year of experience developing and maintaining scalable web applications (Frontend & Backend) for government and private sector projects. Strong in PHP Native, Go, MySQL, PostgreSQL, React.js, jQuery, Tailwind CSS, and RESTful API integration, with hands-on experience in performance optimization, external API integration, caching, and CRON jobs. Recent work includes contributing to E-Kinerja at Kementerian Pekerjaan Umum (Kemen PU), a large-scale employee performance evaluation system.

EXPERIENCES

Kementerian Pekerjaan Umum (Kemen PU) Remote from Purworejo, Indonesia
Fullstack Web Developer | Apr 2025- Dec 2025

- Developed and maintained the E-Kinerja, a government-scale web application for employee performance evaluation, using PHP Native, jQuery, and MySQL
- Implemented new modules (RHK & SKP Evaluation) with automated rating logic, improving usability for hundreds of government employees.
- Integrated external e-HRM API with local systems, including data synchronization, logging, and fallback handling for reliable operations.
- Optimized backend performance by refactoring queries, reducing heavy XHR calls, and implementing caching & CRON jobs for better scalability.
- Collaborated with internal teams to deliver features aligned with organizational policies, ensuring compliance and smooth user adoption.

PT Godigi Prima Satya Bekasi. Indonesia
Fullstack Web Developer |Dec 2024 – Mar 2025

- Built and optimized RESTful APIs in Go and PostgreSQL to support scalable web applications.
- Improved integration with frontend by designing clean and reusable API endpoints.
- Delivered pixel-perfect frontend components from Figma designs using React.js and Tailwind.

KODA Tech Academy *Bogor, Indonesia*
Fullstack Web Developer | *May 2024 – Sep 2024*
Projects:
Tickhub - Online Ticketing Event

- Developed a full-featured online live event booking platform with responsive design for both mobile and desktop users.
- Integrated event listing, ticket category, and user authentication using Golang and PostgreSQL, secured with JWT

Konis - Online F&B Ordering

- Designed and Developed a responsive, full-stack web application for the Konis F&B

Ordering Web App, ensuring optimal user experience and accessibility across all screen sizes (mobile to desktop).

EDUCATION

Yogyakarta Muhammadiyah University, Indonesia
Bachelor of International Relations, GPA 3.27/4.00 *Aug 2018 – Feb 2022*
Activity : Korps Mahasiswa Hubungan Internasional UMY, Dewan Perwakilan Mahasiswa Fakultas Ilmu Sosial dan Politik UMY

Koda Tech Academy - Bogor, Indonesia
Fullstack Web Developer *May 2024 – Sep 2024*
- Learnt front-end development practices: React Js, Redux Toolkit, Tailwind CSS
- Learnt back-end development practices: Golang, Gin-Gonic, PostgreSQL
- Basic DevOps practices: Working with WSL, Docker, and SSH for local deployment
- The built project : Tickhub (Online Ticketing Event), Konis (Online F&B Ordering)

SKILL

- **Programming Languages:** JavaScript, Go (Golang), PHP
- **Frontend Development:** React.js, Next.js, HTML, CSS, Tailwind CSS
- **Backend Development:** RESTful API Development, Gin Framework, Node.js, Laravel, PHP Native
- **Database & Data Management:** PostgreSQL, MySQL, Query Optimization, Data Modeling
- **System Integration:** External API Integration, e-HRM Integration, Data Synchronization, Logging & Fallback Handling, Async programming & Promises
- **Performance Optimization:** Backend Refactoring, Heavy XHR Reduction, Caching Strategy, CRON Jobs
- **Software Architecture:** MVC Pattern, Modular Code Design, Clean API Design
- **DevOps & Tools:** Git, GitHub, Postman, Trello
- **Development Methodologies:** Agile, Scrum, Kanban
- **Problem Solving:** Debugging, Root Cause Analysis, System Reliability Improvement
- **Communication:** Technical documentation, cross-team collaboration, clear stakeholder communication
- **Team Collaboration:** Agile teamwork, Scrum ceremonies, coordination with designers and backend/frontend teams
- **Adaptability:** Fast learning, working across multiple tech stacks, handling changing requirements
- **Time Management:** Task prioritization, meeting deadlines, managing parallel features and bug fixes
- **Ownership & Accountability:** End-to-end feature responsibility, production issue handling, reliability mindset
- **Attention to Detail:** Code accuracy, data consistency, validation and edge-case handling
- **Decision Making:** Logical judgment, risk assessment, choosing optimal technical approaches
- **Customer & User Focus:** Usability awareness, system reliability, impact-driven

development

- **Professionalism:** Work ethics, accountability, consistent performance in regulated environments
